

NULCLASS

Get Real World Experience
We enable the students to gain real education. We help students to get real industry experience by providing them with real time projects. We bridge the gap between knowledge and application.

NULCLASS EDTECH PRIVATE LIMITED

**NO.2/180,, BARUR POST, KRISHNAGIRI,
Tamil Nadu, India- 635201**

Registration Number - 33AAICN0803F1ZZ

TRAINING DETAILS

- During the training session the candidate will learn how to build real time websites from scratch with the help of our expert mentors. If the candidate does not have any prior knowledge there will be no problem.
- The candidate will be added to our premium whatsapp group for 24/7 one to one mentor support in which the doubts will be cleared instantly within a minute.
- The candidate will receive the authorized experience certificate once they complete their training session of 15 hours.

➤ Initially the candidate needs to complete the training session of 15 hours in any one of our projects -Stack Overflow, YouTube, Twitter, Job Posting Website.

➤ The candidate will be able to access Pre recorded videos, Source code, study materials from our website once they complete the process from our website.

➤ There will be the percentage option on our website once you proceed with the training session further the percentage will increase. Once it will be 100% completed it will be considered as the training session has been finished.

➤ There are no time restrictions to complete the training session of 15 hours as it is lifetime accessible, so candidates can complete as per their time preference

Once the candidate has finished the training session they need to submit the screenshot of the 100% completion page from our website to our mail training@nullclass.com and within 24 hours they can able to start their internship.

There will be flexible working hours that are 3 hours on a daily basis and five days in a week. The candidate may select the working hours according to their time

The stipend will be Rs. 3000 fixed. However it will be increased if the candidate will select more than one project.

As the actual fee for the training session on our website is ₹997/- But only for the shortlisting candidate and for limited period of time it will be ₹497/-

INTERNSHIP DETAILS

➤ During the internship the candidate will be supposed to work on the real time projects, Developing and supporting projects from conception to implementation, Creating user interactions.

➤ The duration of the internship will be up to 6 months depending upon the candidate choice (minimum 1 month and maximum 6 months)

➤ The candidate will get the authorized certificate for the internship & they will get a letter of recommendation.

STACK OVERFLOW

- Front end skills – Get a deeper look at the front end development.
- Learn HTML, CSS and JavaScript.
- Understand Redux for state management and Redux Thunk.
- Learn and strengthen your ReactJS Skills.
- Learn about Axios for sending HTTP request to the backend.
- Learn about CRUD operation using MongooseJS.
- Backend Skills – Learn and explore with us Nodejs, Expressjs.
- App development using Node Js.

Database – Getting better clarity about cloud platforms for database deployment

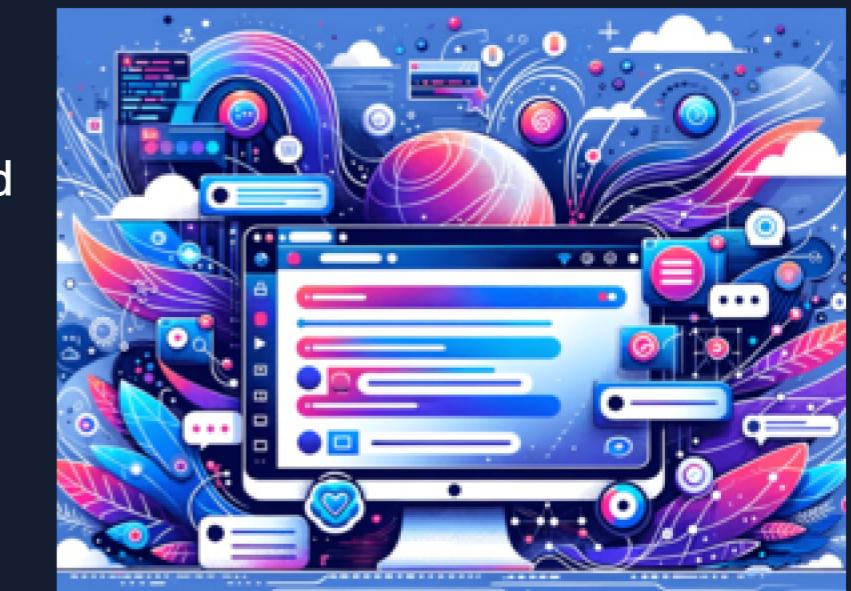

Understand Json web tokens for authentication.

Develop skills – Build full stack GitHub portfolio.

Learn about git operations

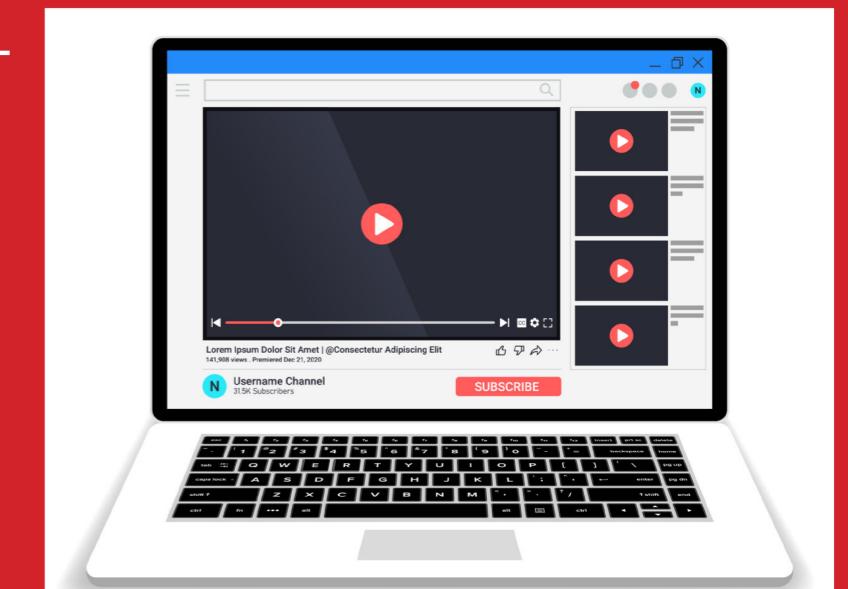

Learn Netify for deploying the front-end.

Learn Heroku for deploying the backend.

- Learn about git operations
- Learn Netify for deploying the front-end.
- Learn Heroku for deploying the backend.
- Learn Google sign in with google authentication API key.

TWITTER

- Front-end skills — Get a deeper look at the front-end development:-
 - Learn HTML, CSS and JavaScript.
 - Learn and strengthen your ReactJS Skill.
 - Learn and explore Material UI.
 - Learn about Axios for sending HTTP requests to the back-end.
 - Learn how to upload or host images online.
- Database — Getting better clarity about cloud platforms for database deployment.
- Students will learn HTML, CSS, and JavaScript for creating the user interface and adding interactivity to the web application.
- Develop skills — Build full stack GitHub portfolio.
 - Learn about git operations.
 - Learn Firebase for deploying the front-end.
 - Learn Heroku for deploying the backend.
 - Learn Google sign-in with the google authentication API key.
- Integrating and working with databases such as MongoDB or PostgreSQL using Mongoose or Sequelize ORM.
- Implementing user authentication using JWT (JSON Web Tokens) and securing API endpoints.
- Learning Node.js and Express.js for building server-side logic and handling API requests.

- Backend Skills — Learn and explore with us Nodejs, and Expressjs:-
 - App development using Node Js.
 - Learn about CRUD operation using MongoDB.
 - Understand how to upload files to the server and get that files and show them on the webpage.
 - Learn about CORS policy and how to avoid it.
- Understanding how to design websites that adapt to different screen sizes and
- Deploying web applications on cloud platforms and configuring server settings.
- Understanding how to integrate and work with external APIs like the Twitter API.

JOB POSTING

- Real-World Project Insight: Understand the dynamics of project development, from teamwork to deployment.
- Firebase Integration: Master third-party authentication to bolster your project's security and user trust.
- Tailwind CSS Proficiency: Harness the power of utility-first CSS for responsive, visually compelling user interfaces.
- MERN Stack Mastery: Dive deep into MongoDB, Express.js, React.js, and Node.js for a comprehensive development skill set.
- Rapid Development Techniques: Discover strategies to expedite your project workflow within the modern development ecosystem.
- Deployment Know-How: Learn to navigate the deployment landscape, ensuring your project's successful launch and accessibility.
- Students will deepen their understanding of version control systems beyond basic Git commands, exploring concepts like branching strategies (e.g., GitFlow), resolving merge conflicts, and code review workflows using platforms like GitHub or GitLab.

The student will gain an understanding of real-world project dynamics, including project management, collaboration, and workflow.

They will delve into the implementation of third-party authentication using Firebase, learning how to integrate it seamlessly.

Students will learn about UX design principles such as usability, accessibility, and user interface (UI) design patterns to create

They will learn essential deployment strategies to effectively launch their projects into production environments
